Moto Snap

1080p Motorcycle Wi-Fi Sony STARVIS Dash Cam

The Moto Snap motorcycle dash cam records in 1080p and is empowered with a Sony STARVIS sensor, rendering sharp and clear video in both day and night conditions. The snap-in design allows for instant power-on and record functionality without the need to press any buttons to start recording. It comes equipped with a powerful built-in 3200mAh battery, for up to 7 hours of continuous recording. Seamless integration with the Moto Snap app allows you to instantly view, download, and share recordings via Wi-Fi using your smartphone. Using AI noise reduction technology, the Moto Snap reduces wind noise in recordings so you can hear important sounds more clearly. A built-in tilt sensor allows the camera to recognize if your vehicle has fallen over, and it will save the current recording as a locked emergency file, so it is not accidentally overwritten by loop recording. Includes a 32GB microSD card (supports up to 128GB), recording hours of footage before it's loop recorded over. With the Moto Snap, you can have video evidence ready when you need it the most.

1080p Full HD

Capture clear footage of license plates, signs, and other drivers when you're on your motorcycle. Provide clear evidence when you need it the most.

Sony STARVIS Sensor

Empowered with the Sony STARVIS sensor to render a more well-lit video in the dark. Provide video evidence when you need it the most.

Wi-Fi for Instant File Sharing

Connect your dash cam to the mobile App on your smartphone to conveniently view, download, and share your footage instantly

IP67 Water Resistant

Drive with more visibility no matter the weather. View a clear image when driving in the rain or snow with an IPX7 resistant rear camera proven to withstand harsh weather conditions.

7 Hours of Recording

Utilizing a powerful 3200 mAh battery, record up to 7 hours of riding footage.

Tilt Emergency Saving

If the dash cam is fully tilted, meaning the rider was possibly in an accident, it will automatically lock onto the emergency file so it won't be loop recorded over.

AI Noise Reduction

Utilizing advanced AI technology, the dash cam will automatically reduce the wind noise to hear the recorded sounds more clearly.

Specifications

Resolution: 1920 x 1080p 30FPS

Image Sensor: Sony STARVIS

FOV: 129° Wide-Angle

Tilt Sensor: Yes

Video Format: .ts

Storage Memory: 32GB included (Supports up to 128GB)

Mount: Snap-on Mount with multiple attachments

Interface: USB-C

Power Supply: 3200mAh Lithium

Operating Temperature: -20° ~ 70° C

Wi-Fi iOS/Google App: Moto Snap
