

The new standard in vehicle boosters.

The weBoost Drive X multi-user cell signal booster offers driver and passengers a more affordable way to enjoy strong and reliable coverage.

Drive X, weBoost's multi-user cell signal booster, offers driver and passengers an affordable way to enjoy more reliable coverage. It provides a cost-effective solution for improving cellular connectivity for multiple devices, simultaneously.

Ideal for passenger cars, trucks, vans, and SUVs, Drive X can enhance cell signal on all available network speeds from far away towers—at distances up to 33% farther than Drive Sleek. With its Mini-Magnet outside antenna, the Drive X installs in just minutes (without tools). Immediately, it works to stop dropped calls, improve voice quality, increase streaming quality, and more.

The Drive X is compatible with all cell phones, hotspots, tablets, and other cellular-connected devices and works on all carrier networks.

DRIVE X

Key Features

As our most affordable multi-user, in-vehicle cell signal booster, Drive X offers a cost-effective way to improve cellular connectivity when on the road.

The Drive X can be easily installed inside any passenger car, truck, van or SUV in just minutes; without the need for tools or extra accessories.

The Drive X provides better coverage and can reach far away cell towers at distances up to 33% farther than our Drive Sleek single-user vehicle booster.

Drive X comes with the Mini-Magnet outside antenna; allowing for secure placement on vehicle roofs. Adhesive disk included for aluminum rooftops.
