SURECALL INCREASES SIGNAL
FOR OPTIMAL CELL PHONE
PERFORMANCE

www.surecall.com

ABOUT

SureCall

We specialize in the design and manufacturing of cell phone signal boosters and accessories. Our cellular signal boosters dramatically improve cellular reception for businesses, homes, vehicles and watercraft. Our flagship product line of IC approved cell phone signal boosters enhance the range and reception of almost any cellular transmission, including voice, text and 4G LTE data.

How Our Cellular Boosters Work

Signals sent from a cell tower are received by an outside antenna, amplified by the booster and then transmitted to a cell phone via an inside antenna.

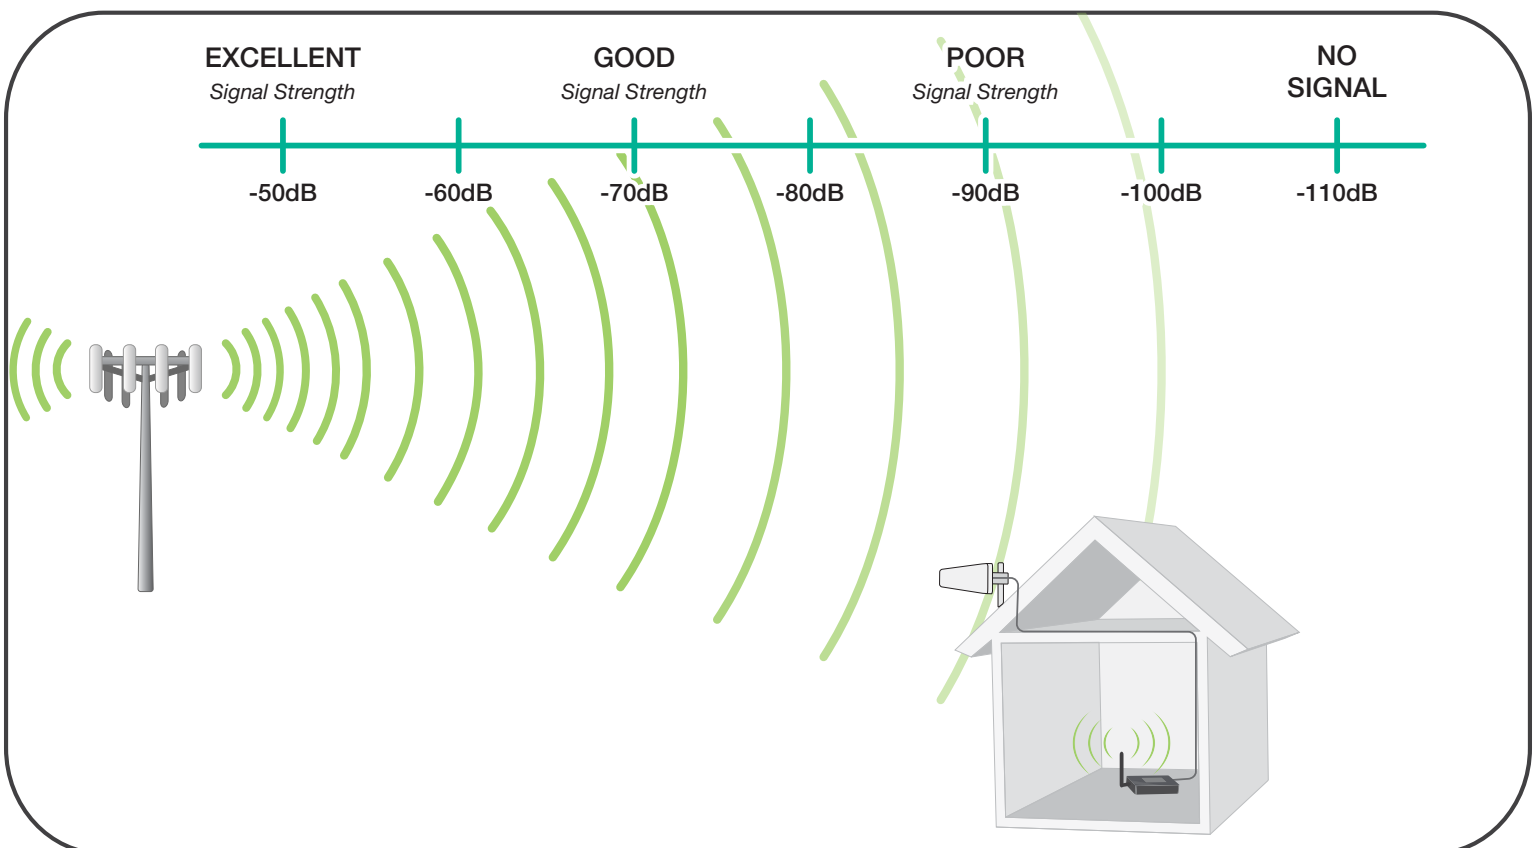

When a call is made, the signal is sent to the inside antenna amplified and sent back to the outside antenna and then on to the cell tower. See illustration below:

SureCall is the performance leader of cell phone signal boosters.

- Highest quality materials and workmanship
- Patented innovative designs
- Unrivalled installer support and system design assistance
- Industry leading 3-year warranty

There are several key product attributes that make our cellular signal boosters better than the competition, including:

- Separate uplink/downlink lanes
- First to market innovation
- Adjustable Gain

EZ Call

RESIDENTIAL SIGNAL BOOSTER KIT

Built on SureCall's patented cellular booster technology, the EZ Call is the first of its kind in the "Easy Install" dual band cell phone signal booster category. The competitively priced booster increases cellular signal strength where signal is weak due to distance from tower, topography, building materials or structural design.

The SureCall EZ Call brings cutting-edge, all-carrier technology to a beautifully designed booster. The easy-to-install kit delivers clear and consistent voice and text signals without the need to drill holes or mount an antenna outside.

The EZ Call covers 1-2 rooms, up to 2,000 square feet, with no outdoor antenna placement required.

FEATURES

- Sets Up in Minutes - Simple Plug-and-Play Install
- Boosts Voice and Text Signals for All Cell Carriers
- Reduces Dropped & Missed Calls
- Covers 1-2 Rooms of a Home or Small Office, up to 2,000 Sq Ft
- Supports Multiple Users Simultaneously
- Industry leading 3-year warranty

Model #: SC-DualEZ-72-DT-Kit

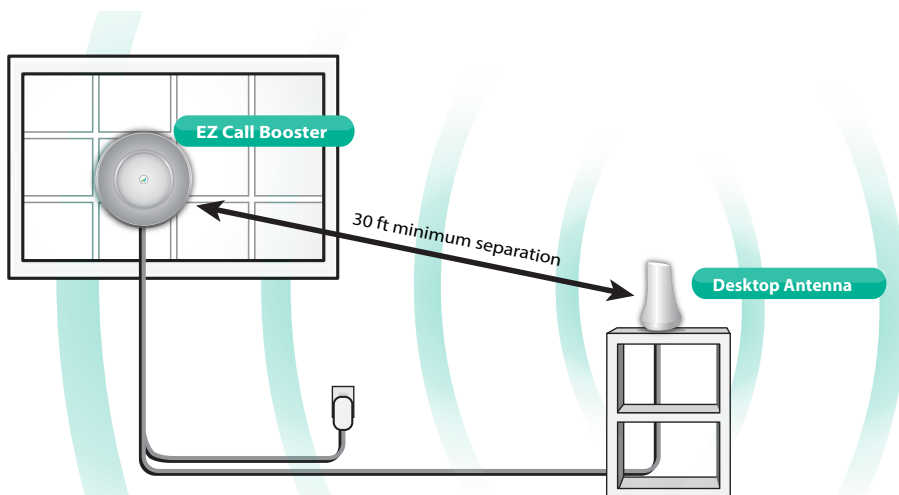

Bands 2G/3G Voice and Text

Coverage 1-2 rooms

Max Gain 72 dB

Uplink Frequencies 824-849 / 1850-1915

Downlink Frequencies 869-894 / 1930-1995

EZ 4G

RESIDENTIAL SIGNAL BOOSTER KIT

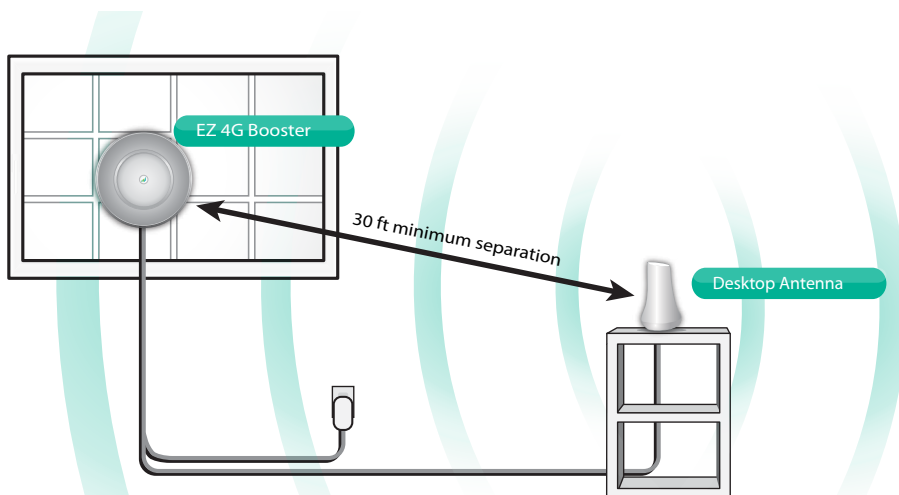

Built on SureCall's patented five-band cellular booster technology, the EZ 4G is the first of its kind in the "Easy Install" cell phone signal booster category. The competitively priced booster increases cellular signal strength where signal is weak due to distance from tower, topography, building materials or structural design.

The SureCall EZ 4G brings cutting-edge, all-carrier technology to a beautifully designed booster. The easy-to-install kit delivers clear and consistent voice, text and 4G LTE without the need to drill holes or mount an antenna outside.

The EZ 4G covers 1-2 rooms, up to 2,000 square feet, with no outdoor antenna placement required.

FEATURES

- Sets Up in Minutes - Simple Plug-and-Play Install
- Boosts Voice, Text and 4G LTE Signals for All Cell Carriers
- Reduces Dropped & Missed Calls
- Covers 1-2 Rooms of a Home or Small Office, up to 2,000 Sq Ft
- Supports Multiple Users Simultaneously
- Industry leading 3-year warranty

Model #: SC-PolyEZ-DT-72-Kit

Bands 2G/3G, 4G LTE

Coverage 1-2 rooms

Max Gain 72 dB

Uplink Frequencies 698-716 / 776-787 / 824-849
1850-1915 / 1710-1755

FlexPro: Yagi/Whip

RESIDENTIAL SIGNAL BOOSTER KIT

The SureCall FlexPro is a cell phone signal booster designed for home and small office use. This booster enhances voice and text signals where signal is weak due to distance from tower, topography or building materials. Fully configurable for all indoor environments, FlexPro signal booster ensures enhanced call clarity for 2-4 rooms and simultaneous users.

The FlexPro SC-DualH/O-72-YRA-Kit includes a FlexPro signal booster, outside Yagi antenna, inside whip antenna, and 50' of RG-6 cable.

FEATURES

- Boosts indoor voice and text signals for inside a home or office
- Reduces dropped and missed calls
- Best for locations with marginal outside signal (1+ bars)
- Durable metal housing provides long-term reliability
- Extends battery life
- Stealth technology incorporated- transmit signal becomes dormant when not in use, providing green, power saving operation
- Industry leading 3-year warranty

Model #: SC-DualH/O-72-YRA-Kit

Bands 2G/3G Voice and Text

Coverage 2-4 rooms

Max Gain 72 dB

Uplink Frequencies 824-849 /1850-1915

Downlink Frequencies 869-894 / 1930-1995

FlexPro: Cellular Reach (CR)

RESIDENTIAL SIGNAL BOOSTER KIT

The SureCall FlexPro CR is a cell phone signal booster designed for homes and small offices in rural locations. This booster produces enhanced voice and text signals on CEL 800 MHz networks where signal is weak due to distance from tower, topography or building materials. Fully configurable for all indoor environments, FlexPro signal booster ensures enhanced call clarity for 2-4 rooms and simultaneous users.

The FlexPro CR includes a FlexPro signal booster, outside high-gain directional Yagi antenna, inside whip antenna, and 50' of low-loss RG-11 cable.

FEATURES

- Boosts indoor voice and text signals operating on CEL 800MHz
- Reduces dropped and missed calls inside a home or office
- High performance to be operational in remote locations with marginal signal (1+ bars)
- Durable metal housing provides long-term reliability
- Extends battery life
- Stealth technology incorporated –transmit signal becomes dormant when not in use, providing green, power saving operation
- Industry leading 3-year warranty

Model #: SC-DualH/O-72-YXRA-Kit

Bands 2G/3G Voice and Text

Coverage 2-4 rooms

Max Gain 77 dB

Uplink Frequencies 824-849

Downlink Frequencies 869-894

The SureCall Fusion4Home is an all-carrier cell phone signal booster designed for home and small office use. The booster produces enhanced voice, text and 4G LTE data signal where signal is weak due to distance from tower, topography or building materials. Fully configurable for all indoor environments, Fusion4Home signal boosters ensure enhanced call clarity for for 2-4 rooms and simultaneous users.

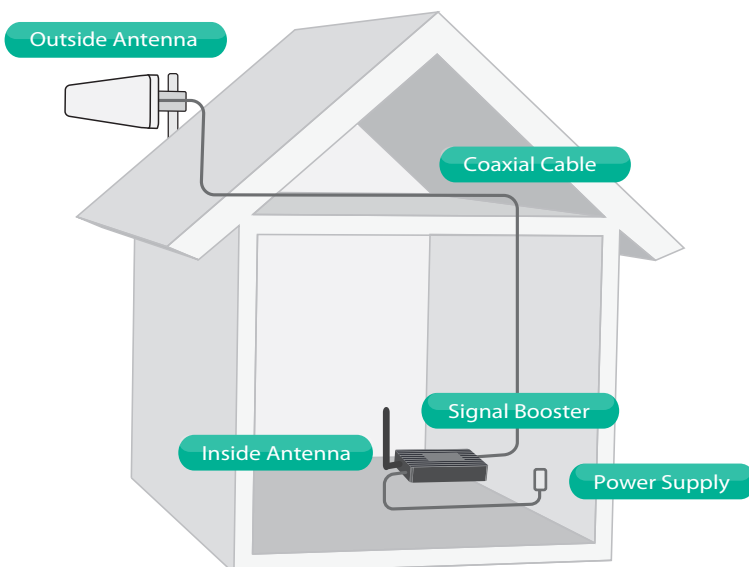

The kit includes a Fusion4Home signal booster, an outside Yagi antenna, an inside whip antenna and 50 feet of RG6 cable.

FEATURES

- Boosts talk, text and 4G LTE signals for inside a home or office
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- All carrier frequencies are independently controlled
- Quality metal construction, durable and resilient
- Boosts signal for all major cellular carriers
- Offers the industry's best three year warranty

Fusion4Home: Yagi/Whip

RESIDENTIAL SIGNAL BOOSTER KIT

Model #: SC-POLYH-72-YRA-CA-Kit

Fusion4Home: Yagi/Panel

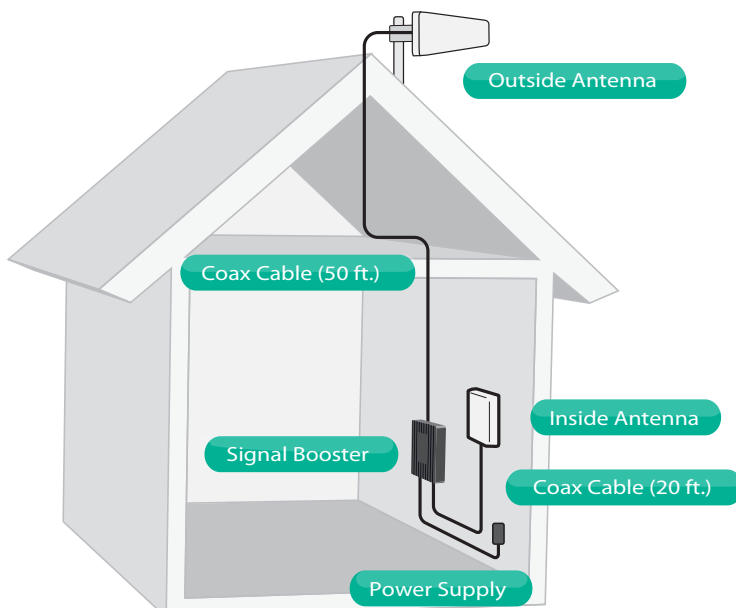

RESIDENTIAL SIGNAL BOOSTER KIT

The SureCall Fusion4Home is an all-carrier cell phone signal booster designed for home and small office use. The booster produces enhanced voice, text and 4G LTE data signal where signal is weak due to distance from tower, topography or building materials. Fully configurable for all indoor environments, Fusion4Home signal boosters ensure enhanced call clarity for 2-4 rooms and simultaneous users.

The kit includes a Fusion4Home signal booster, an outside Yagi antenna, an inside panel antenna, 20 feet of SC-240 coax cable and 50 feet of RG-6 coax cable.

FEATURES

- Boosts voice, text and 4G LTE signals for inside a home or office
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- All carrier frequencies are independently controlled
- Quality metal construction, durable and resilient
- Boosts signal for all major cellular carriers
- Industry leading 3-year warranty

Designed for offices or buildings up to 20,000 square feet the Fusion5X booster enhances voice, text and 4G LTE data for all North American carriers. Configurable for all indoor environments the Fusion5X provides call clarity and increased data speed for 20+ simultaneous users.

FEATURES

- Reduces dropped and missed calls and improves 4G LTE data speeds
- Durable metal housing provides long-term reliability
- Automatic dB gain/attenuation optimizes booster performance without dials
- Best-in-Industry three-year warranty
- Industry leading 3-year warranty

Fusion5X

RESIDENTIAL SIGNAL BOOSTER

Model #: SC-PolyXH/O-72

Bands 2G/3G, 4G LTE

Fusion5 CA

COMMERCIAL SIGNAL BOOSTER

The Fusion5 CA is a five-band commercial booster that provides 2G/3G and 4G LTE enhancement for all major cell carriers and is configurable for all indoor environments. Fusion5 CA for Canada is a 3-watt amplifier that covers buildings up to 20,000 square feet and 20+ simultaneous users.

FEATURES

- Boosts talk, text and 4G LTE signals for inside a large home or office building
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- All carrier frequencies are independently controlled
- Quality metal construction, durable and resilient
- Boosts signal for all major cellular carriers
- Industry leading 3-year warranty

Model #: SC-PolyH/O-72

Bands	2G/3G, 4G LTE Voice & Data

INDUSTRIAL SIGNAL BOOSTER

Signal solution for large buildings and warehouses

Industrial
Booster

Boosts
4G LTE

Supports
Multiple Users

The Force5 is an alternative Voice and Data solution to a DAS system at a fraction of the cost.

Modular in design, each Force5 provides enhanced cellular and data reception for areas up to 80,000 square feet and supports up to 100+ simultaneous users.

FEATURES

- Boosts voice, text and 4G LTE data signals inside a large home, commercial building or warehouse
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- All carrier frequencies are independently controlled
- Quality metal construction, durable and resilient
- Boosts signal for all major cellular carriers
- Industry Leading 3-year warranty

Connect

SureCall's Fusion2Go is a mobile 5-band voice, text and 4G LTE booster that increases signals for all major cell carriers.

The Fusion2Go is a 3-watt amplifier kit that is easy to install and supports multiple simultaneous users inside the vehicle.

The signal booster kit includes Fusion2Go booster, magnetic-mount exterior antenna with an attached cable, interior antenna with attached cable, DC car adapter for vehicles and screws for mounting the booster.

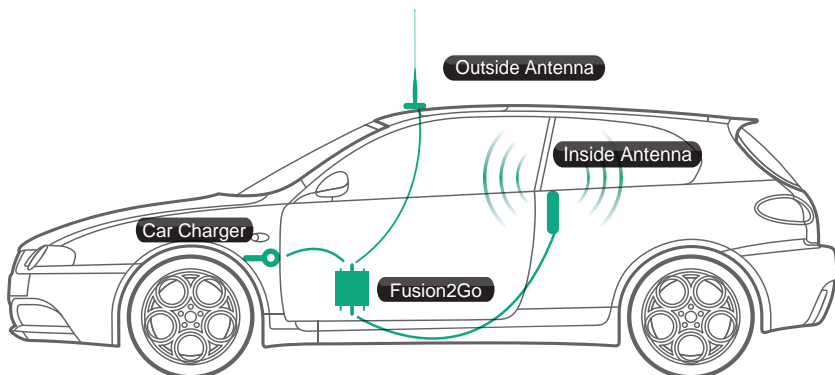

FEATURES

- Boosts Talk, Text and 4G LTE data signals for all Canadian carriers inside your vehicle
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- Higher transmitting power for better performance
- No cradle or docking station required
- Stealth technology incorporated – transmit signal becomes dormant when not in use, providing green, power saving operation
- Industry Leading 3-year warranty

Accessory

The SureCall RF signal meter measures 2G, 3G and 4G LTE signal strength for all major US carriers. Extremely competitively priced, this portable signal meter is extremely versatile and sturdy.

Featuring selective modes and backlit screen for dark areas, the SureCall signal meter was designed with the professional system installer in mind. With easy to use button controls, this meter is ideal for a wide variety of installer field needs and uses.

FEATURES

- Measures LTE, AWS, PCS and Cellular frequencies
- Assists with the aiming of external directional antennas
- High sensitivity -110dBm
- Three selectable modes—frequency bands and block power
- Backlighting for dark environment
- 2.5 hour active working life and rechargeable

Resources

RESOURCES

MARKETING

- Photo & Digital Asset Library

Show off your SureCall offerings by adding product photos to your website, creating flyers and brochures or putting together a catalog. You can download a picture of every booster kit, antenna and accessory here: <http://adobe.ly/1LNn0gT>

- Data Sheets & User Guides

Download and share professionally designed product data sheets. The data sheets not only share technical specs, they also provide a list of all benefits and features, photos and how-it-works illustrations.

Access data sheets & user guides here: <https://adobe.ly/1LNn0gT>

- Design

For in-building design support. Complete the *design questionnaire*, include a building coverage schematic (with visible dimensions) and e-mail design@surecall.com

INSTALLATION

- Locate Towers

As a SureCall dealer, you have free access to the Loxcel-SureCall Canadian Cellular Tower Locator Tool. To locate cell towers and analyze signal strength, visit:
